

Release notes for Elos Accurate[®] Library exocad

Elos Accurate[®] Model Analog – v4.1.1

Compatible with Exocad version: DentalDB 2016.10 Build v2.2-6654

May 2018

Minor update:

The Model Analog library has been updated due to the lack of a visualization file for the model analog for Nobel Biocare Multi unit NP/RP.

The issue only effects the visualization of the model analog in the Model Creator software. It has no impact on the restoration.
